- *A Kingdom for Giants* does nothing to diminish the iPad Pro's capabilities when it comes to gaming. This is not a simple task, especially when considering that *A Kingdom for Giants* is made using Unity, a sophisticated game engine supported on all current Apple platforms. Nevertheless, the game runs smoothly, and I have not seen any significant performance problem. The tablet-sized photos and the iPad Pro Both feel like they were made for one another. When I first encountered this game some months ago, I had used the iPad Pro for a backup during the campaign. However, I did not use it for editing and then took it with me on a vacation and left it at home for the duration of our stay. So, I used to do everything on the iPad Air 2, until I decided I needed to know more. Now that I do, the entire experience is so enjoyable and convenient. The games main character, Uli, is a curious and charming young girl. Throughout her journey, she encounters villagers and creatures of all kinds, and learns how to build a new life for herself. On the iPad Pro, everything just feels more responsive and put together with a higher level of polish. The design of the game with its backdrops and graphics is very well executed. **ABOVE:** A composite image of my wife's jewelry with a set of silver and gold leaf images from photo-editing web site Digital Nature . **BELOW:** A composite image of my wife's jewelry with a set of silver and gold leaf images from Adobe Photoshop Elements 11.

Compared to desktop applications, laptops require more attention. Your laptop is constantly on the move, and an updated graphics and operating system can greatly increase its performance. I use an excellent program called Windows Update, which can find and install updates automatically for you. While you may think you're OK updating your OS, Photoshop and other programs on your own is not a good idea - you may need to wait for availability of an update. It's usually worth the wait, but if you have a particular program that you use regularly, you can subscribe to a monthly or annual subscription and have the program automatically update itself. 933d7f57e6
